

Guidelines for Sizing Male and Female Scout Uniforms.

The necessary length of any Navy garment (jumper, coat, or trousers) is determined by the height of the individual wearer as measured in stocking feet.

It is important that all scouts be measured prior to purchasing a uniform.

DO NOT BASE MEASUREMENTS ON CIVILIAN WEAR.

The following Measurements are needed prior to purchase:

Ship number	Skipper	Address	Name of Scout or Scouter	Head Measurement
Sex	Age	Height	Weight	Neck Measurement
Measurements needed for Males	*Under-Arm Measurement* *Over-Arm Measurement	Sleeve Measure from the back of the neck to the wrist.	*Waist Measurement	Inseam
Measurements needed for Females	*Waist Measurement (female)	Sleeve Measure from the back of the neck to the wrist.	Neck Measurement	*Bust size(Female)

***Under-Arm measurement-** Measurement taken around the chest under the arms.

***Over –Arm measurement-** Take measurement around the chest but **INCLUDE** the arms

***Waist measurement-** Take measurement around the Belly Button

***Inseam measurement-** Taken on the inside of the leg, from foot to crotch.

***Bust Size-** Measurement taken at fullest point.

***Waist measurement-**Measurement taken at fullest point.

It is the responsibility of the unit leaders to provide measurements for mail orders. Please take the time to measure scouts properly at meetings. Don't rely on today's sizing of a youth or leader. Uniforms are military sized and **DO NOT** run size wise to today's sizes. Mistakes can happen, but they are costly and time consuming.
